## ■ **Hinckley to Splash T44 MK II in June**

It's been 10 years since Hinckley's T44 Express was first launched. It quickly became one of its most successful models, evolving over the years to include both Flybridge and Motoryacht versions. Now in June the company is poised to launch the T44 MK II. New Cummins 550-hp common rail, fully electronic engines will power the T44 MK II at predicted cruising speeds of up to 30 knots. The redesigned pilothouse offers incredible sightlines and 360-degree visibility for both the helmsman and guests. Optional layouts include one or two sleeping cabins. Sliding side windows and overhead hatches introduce plenty of light and fresh air. Hinckley's patented JetStick steering and control system incorporates the latest electronic technology and it is, of course, integrated with a powerful hydraulic bow thruster that allows any helmsperson to move the vessel sideways with just two fingers on the controls. ## ■ **I Can Hear You Now**

Although the official line from Inmarsat is that it'll be out in June, the talk on the street is that you can look for Inmarsat's first global handheld satellite telephone in May. IsatPhone Pro will provide the ultimate combination of an easy-to-use robust handset with long battery life, a reliable network connection with clear voice quality, and global coverage.

The IsatPhone Pro will support satellite telephony (including Bluetooth for hands free use) voice mail, text and e-mail messaging and location data.

A range of docking stations will be available to enable convenient use of the handset indoors, in a vehicle or at sea. Other accessories such as Bluetooth headsets and solar chargers will also be available. [globalsatellite.us](http://globalsatellite.us)

## ■ **Light up Your (Water) Life**

This is the easiest piece of marine equipment you'll ever install. The instructions: Throw it in the water in the desired area; plug it in.

Krypto-Night is a waterproof light whose bulb has a 10,000-hour life. It lights up the water around your dock with a light ring that should be double the depth of the water. It comes with an impact resistant dome in your choice of red, blue, green, or clear glass, 12-pound weighted base, 35-foot of marine grade cable, GFI plug, and a one-year warranty. A photo-cell, facilitating automatic operation, is optional. Conceived and made in the USA. [greendocklights.com](http://greendocklights.com)
